## Portable Laptop Station

The WorkRite TravelRite™ portable laptop station is designed for the highly mobile laptop user. The TravelRite can be used in an office environment or on the go. Laptop computers create several unique ergonomic challenges when it comes to user comfort and safety. The TravelRite, used alone or with other ergonomic accessories, improves posture, reduces risk of repetitive strain injuries, and improves user comfort. Auditors, consultants, and other avid laptop users agree the TravelRite offers essential ergonomic flexibility to use laptop computers comfortably.

**In The Office** – TravelRite can be used as a stand-alone support for the laptop. Used with a full size keyboard and mouse, TravelRite improves head, neck and shoulder positions by adjusting the laptop display into comfortable viewing positions. The addition of full size keyboard and mouse on the desktop or on a keyboard arm and platform complete the transition from mobile to office.

**On The Fly** – TravelRite allows the user to set viewing height of the display while creating comfortable keying positions and wrist support. TravelRite's compact design fits neatly onto the tray table on the airline or on the desk at the hotel.

**Flexible** – TravelRite features simple height and angle adjustment using a unique slide-bar design. Adjustable palm support can easily match the height of the laptop for a perfect fit.

**Comfortable** – JelRite™ ergonomic padded palm support relieves pressure on the carpal tunnel nerve, improving user comfort. The palm support is upholstered in our durable high quality LeatheRite™ material made of 100% nylon for a lifetime of use and comfort.

**Durable** – TravelRite is manufactured from strong UltraThin™ solid phenolic. Using steel hinges and fasteners, the TravelRite is tough enough to go mobile for business travel. TravelRite folds flat for easy mobility and storage in a briefcase.

**Limited Lifetime Warranty** – As with other WorkRite products we stand behind our reputation for quality and longevity in product performance.
